

Hello,

I am writing to you regarding the Junior Full Stack Developer position at your esteemed company. I have recently completed a full stack web development course and I am very interested in this role.

Through my training, I have gained good skills in front-end technologies like HTML, CSS, JavaScript, and React. I have also learned back-end languages and frameworks such as Node.js, Express, and MongoDB. I have experience building complete web applications that connect the user interface with APIs, databases, and server-side logic.

Some of my recent projects that I am proud of include:

- An e-commerce website with an interactive shopping cart, product search, and admin features, built using the MERN stack
- An Clone website very basic similar to Instagram with Express, NextJs and MongoDB
- An Clone Website of Airbnb with by Node, Express, and MongoDB

Apart from my technical skills, I am a good communicator and I work well in teams. I am passionate about writing clean, maintainable code and keeping up with the latest web development trends. With a strong desire to learn and grow, I would greatly appreciate the opportunity to apply my skills as part of your innovative team.

Thank you for your time and consideration. I look forward to discussing this opportunity further.

Sincerely,
Ch.Manideep
